EXPERIENCE

Patagonia Education **Middlebury, VT**

Software Web Developer *May 2025*

▪Developed and integrated two customized Stripe payment flows for Campaign 1 and Campaign 2, supporting both one-time and recurring donations with campaign-specific logic.

▪ Implemented Stripe webhooks to trigger automated email confirmations upon successful payments, improving donor communication and reducing manual admin follow-up.

▪ Designed and connected dynamic multi-step forms to a centralized database, ensuring donor information, donation details, and campaign preferences were accurately stored and easily accessible.

Middlebury Consulting Group **Middlebury, VT**

Data Analyst - World Data Labs Client *February 2025 - present*

▪ Collaborated with team members to refine analysis goals and improve the clarity and impact of visual outputs.

▪ Created data visualizations to highlight key trends and insights, supporting decision-making

▪ Wrote custom scripts to categorize and segment data into meaningful groups based on parent node and price elasticity.

▪ Collaborated with a team to develop and present data-driven solutions for a mock company, delivering a comprehensive report with insights, visualizations, and actionable recommendations.

Panther delivery Services - MiddDash **Middlebury, VT**

Lead Software developer *April 2025-present*

▪ Spearheaded development of new admin dashboard features to streamline content management, improving administrative workflows and reducing manual overhead.

▪ Diagnosed and resolved bugs across frontend and backend logic, improving site stability and user experience.

▪ Built and deployed a real-time paycheck tracking system for Dashers, allowing users to instantly view their earnings, completed deliveries, and status updates.

▪ Led full-stack development efforts across the platform, contributing to both frontend interfaces and backend logic for delivery, menu, and user systems

Software developer *February 2024*

▪ Built a time-based automation system to control menu visibility and platform behavior based on predefined schedules, reducing the need for manual updates.

▪ Maintained clean, scalable code and ensured seamless integration between dynamic content and frontend display.

▪ Added toggle/disable buttons for menu items, giving admins control over item availability in real time without code changes.
